

APPENDIX

MARKED-UP CLAIMS

3. ³ (Amended) The antifoaming coating according to Claim 1, or 2, wherein the acrylic resin constituting said metal-containing acrylic resin has an acid value of 80 to 300 mg KOH/g and a glass transition temperature of not higher than 5 °C.

4. ⁴ (Amended) The antifoaming coating according to Claim 1, or 2 or 3, wherein the monobasic acid has an acid value of less than 200 mg KOH/g.

5. ⁵ (Amended) The antifoaming coating according to Claim 1, 2, 3, 4, 5 or 6, wherein the monobasic acid has a diterpene dihydrocarbon skeleton, or a salt thereof.

6. ⁶ (Amended) The antifoaming coating according to Claim 1, 2, 3, 4, 5, 6 or 7, wherein the monobasic acid is selected from the group consisting of abietic acid, hydrogenated abietic acid and their salts.

7. ⁷ (Amended) The antifoaming coating according to Claim 1, 2, 3, 4, 5, or 6, wherein the monobasic acid is selected from the group consisting of rosin, hydrogenated rosin and disproportionated rosin.

8. ⁸ (Amended) The antifoaming coating according to Claim 1, 2, 3, 4, 5, 6, 7 or 8, wherein the metal M is copper or zinc.

9. ⁹ (Amended) The antifoaming coating according to Claim 1, 2, 3, 4, 5, 6, 7 or 8, wherein the ratio of the mass of the metal-containing acrylic resin to the mass of the monobasic acid is 1 to 100, by weight, or a proportion of the material.
